Ramaiah Post Graduate Teaching Program 2019

April 6 & 7, 2019

Organized by :
Dept. of Orthopaedics
Ramaiah Medical College,
Bangalore

Under aegis of
KOA, BOS and OASIS

Venue:
Ramaiah Advanced Learning Centre

Post graduate teaching programme,
OSTEON-2019.

Orthopaedic Scholars Training and Education.

Introduction

There has been a revolution in Post-graduate training, since the inception of teaching initiatives under the aegis of Indian Orthopaedic Association. The primary objective is to ensure standardised training, with an emphasis on clinical advances and practical application. The program is designed around both traditional and innovative teaching methods to cater to all cadre of students.

This annual program, is a much awaited scholastic event for all post-graduates. As an opportunity to measure their preparedness, as well as resolve academic conflicts. The teachers expected are both seasoned examiners and also masters in their chosen specialities.

The two days will provide a unique dual advantage to the student, to not only get an intense grasp of the examination environs, but also equip him with clinical skills in our Advanced Learning Centre workshop. Emphasis is also placed on knowledge and interpretation of various imaging modalities. This year's program, concentrates on practical skills, case discussion and important aspects of bedside clinics and viva-voce.

Organizing Chairman

Dr Naresh Shetty
