EPIJNAN 2018

10 & 11 NOVEMBER

A COMBINATION OF INTERACTIVE
LECTURES AND HANDS ON TRAINING IN
EPILEPSY SURGERY

EPILEPSY ranks among the most commonly encountered serious neurological conditions. Medically refractory epilepsy is a major concern not only for patients and their families but also for the society at large. Treatment options are varied, ranging from medical management to surgical intervention. Keeping these issues in mind, we, at the Department of Neurosciences, Aster CMI Bangalore are conducting EPIJNAN 2018, an interactive conference focusing on recent advances in epilepsy surgery. One of the important highlights of this program shall be the HANDS-ON CADAVER WORKSHOP. We hope the conference extends the horizons of the participants knowledge about epilepsy surgery. Looking forward to your active participation in this program.

Dr. Ravi Gopal Varma
Chairperson, Chief of Neurosciences

Dr. Nirmala S
Organizing Secretary
