PELVIC ANATOMY WORKSHOP

Saturday, 24th June, 2023

Venue :
Ramaiah Advanced Learning Center

INVITATION

Welcome to our Pelvic Anatomy workshop!

Pelvic surgery requires a comprehensive knowledge of pelvic anatomy to safely perform procedure, ensure hemostasis and avoid injury to surrounding blood vessels and viscera.

The anatomical knowledge of female genital tract, lower urinary tract and gastrointestinal tract is a must to perform laparotomy or laparoscopy.

Surgery without knowledge of anatomy is like sailing in the sea without compass.

One of the commonest complications following childbirth is Post Partum Haemorrhage. Various methods of treatment are there, both medical and surgical. One of the treatment is ligation of internal iliac artery which requires skill.
