TEAR TRAIL - 2019

Workshop on Lacrimal Sac Surgeries

March 24, 2019

Venue: Ramaiah Advanced Learning Centre

Dear Friends,

Lacrimal sac surgeries have been popular for nearly a century, inspite of which, DCR surgeries are fraught with apprehensions among ophthalmologists. This workshop aims at giving an opportunity to ophthalmologists to learn and improve their skills in DCR-both external and endonasal. Participants will have the privilege of working on fresh frozen cadavers, the advantage of which is the presence of a high degree of anatomic realism and near normal tissue properties.

Using a combination of discussion and dissection, participants will imbibe a lucid understanding of the anatomy, the surgical procedure and the complications while doing DCR. The delegates will get hands-on cadaver training by experts on external DCR and endonasal DCR. They will be able to learn the skill of silicon intubation as well. To guide us through this, we have experienced surgeons and speakers of national eminence.

8:30 am Registration

Lectures

9:00-9:20am Anatomy of the lacrimal drainage system

9:25-10:05am External
Dacryocystorhinostomy

10:10-10:30am Endonasal
Dacryosystorhinostomy

10:30-10:45am Tea

Demonstration

10:45-11:15am External Dacryocystorhinostomy

11:15-11:45am Endonasal
Dacrycystorhinostomy

12.00-12:30pm Lunch

Hands on

12:30-1:30 Batch 1:

1:30-2:30 Batch 2:

2:30-3:30 Batch 3:

3:30-4:30 Batch 4:
